Career Objective

Final-year B.Tech Computer Science (Data Science) student with hands-on experience in Python, SQL, Machine Learning, and Data Analysis. Skilled in developing ML applications using Scikit-learn, Pandas, NumPy, Streamlit, and Plotly, with knowledge of HTML and CSS. Seeking an internship or entry-level opportunity in Data Science, Machine Learning.

Education

D. Y. Patil Agriculture and Technical University, Talsande 2024–2027
B.Tech in Computer Science and Engineering (Data Science) CGPA: 8.87/10

Government Residence Women Polytechnic, Tasgaon 2021–2024
Diploma in Information Technology Aggregate: 83.19%

Shri Mudhaidevi Vidyamandir, Deur 2020–2021
Secondary School Certificate (SSC) Aggregate: 91.80%

Technical Skills

- **Programming Languages:** Python, SQL, C, C++, HTML, CSS
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit, Plotly, Joblib
- **Machine Learning:** Regression, Classification, Clustering, Data Preprocessing, Feature Engineering, Model Evaluation
- **Data Analysis:** Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization
- **Databases:** MySQL, RDBMS
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code, Power BI

Internship

Amplifier Electronics Pvt. Ltd., Karad 07 Jun 2023 – 22 Jul 2023
Python Intern

- Applied core Python concepts to develop practical programming solutions.
- Developed Python programs to strengthen coding and problem-solving skills.
- Improved debugging techniques and logical thinking through hands-on tasks.

Projects

AgriVision – AI-Powered Crop Yield Prediction & Agricultural Analytics [GitHub] [Live Demo]
Technologies: Python, Streamlit, Scikit-learn, Pandas, NumPy, Plotly, Joblib, Jupyter Notebook

- Developed an end-to-end ML web application for crop yield prediction using environmental and vegetation index data.
- Built interactive agricultural dashboards and visualizations using Streamlit and Plotly.
- Evaluated multiple regression models and selected Random Forest Regressor with an R^2 score of 91.5%; deployed on Streamlit Community Cloud.

House Price Prediction Using Machine Learning [GitHub] [Live Demo]
Technologies: Python, Pandas, NumPy, Scikit-learn, Streamlit, Joblib, Jupyter Notebook

- Developed a Linear Regression model to predict house prices using income, house age, rooms, population, and area-related features.
- Performed EDA, data preprocessing, feature scaling using StandardScaler, and evaluated performance using MAE, MSE, RMSE, and R^2 Score.
- Saved the trained model using Joblib and integrated it into a Streamlit application for real-time predictions.

Achievements

- Secured 2nd Rank in the College-Level Coding Quiz Competition during Diploma.
- Served as the Secretary of the Information Technology Students' Association (ITSA) Committee during Diploma.

Certifications

- Microsoft Power Platform Fundamentals (PL-900)
- Python for Data Science – IBM
- Introduction to Machine Learning – Kaggle
